MANİSA CELAL BAYAR UNIVERSITY INFORMATION SECURITY POLICY

Manisa Celal Bayar University's Information Security Policy covers the activities of our students and staff, the information assets related to these activities, the protection of these assets, and the relevant business processes within the scope of information security studies carried out in order to minimize all risks related to information assets.

In order to achieve this aim, our university undertakes to fulfill the following responsibilities;

- To comply with legal regulations on information security issues,
- To provide secure access to the information assets of the institution and its stakeholders,
- Managing the Information Security Management System in accordance with the TS/ISO 27001:2013 standard,
- Ensuring the establishment of the necessary organizational structure, resources and infrastructure in order to report the violation of information security and to take actions as soon as possible,
- In order to protect our information assets; controlling the activities of storing, transmitting, changing, accessing, processing assets based on current best practices and ensuring that in-process controls are established with the principle of segregation of duties,
- To announce this policy to all our employees and to provide the necessary resources and training for the implementation of the policy,
- To conduct internal audits and to consider the results of these audits in management review meetings in order to monitor compliance and continuous improvement with the Information Security Management System,
- To carry out studies to increase information security awareness,
- To consider the Information Security performance of the candidates and their subcontractors in the selection of suppliers and contractors and to cooperate with them on ISMS issues,
- To be in constructive cooperation with official institutions, individuals and related citizens on ISMS issues,
- To continuously improve and develop the information security level by managing existing and potential risks,
- In case of security violations, to ensure that necessary sanctions are applied to the extent permitted by law.
